HYDRIA™ WATER

CHAIN SCRAPER

Hydria Water has extensive experience and expertise in plastic chain scrapers. This gives our customers dependability and operational reliability with truly innovative solutions.

HYDRIA™ WATER

CHAIN SCRAPER

We always design unique solutions based on the customer's needs, basin size and load. The scrapers are manufactured in configurations for single basins up to 10 metres wide and double basins up to 20 metres wide.

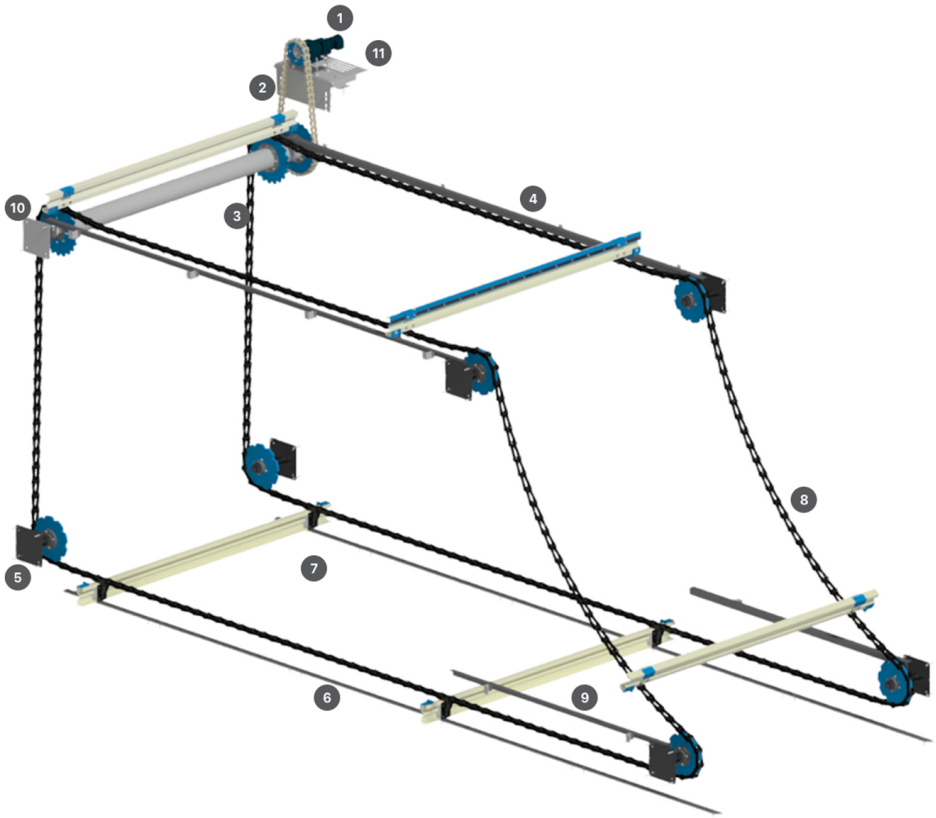

FUNCTIONS

- Lightweight with composite scrapers and plastic chains
- Durable construction with long machine service life.
- Energy-efficient, despite extremely high torques and forces
- High-capacity sludge removal with continuous operation without front/back function.
- Robust and extremely reliable.

SPECIFICATIONS

Width	<10 000 mm
Drive unit	SEW/Nord
Material	EN 1.4301, EN 1.4404
