

RAM PRESS RP

Ram Press RP is a hydraulic press that presses, dewateres and transports screenings and wet waste.

RAM PRESS RP

The press consists of a pipe with a hydraulically driven piston that forces the screenings into a pipe system or other back force device that creates resistance.

FUNCTIONS

- Strong stainless design enables high compressive forces and excellent dry contents.
- Modern design based on proven concept. Manages conveyor lengths >10m.
- Stainless hydraulic unit.
- Optional perforation surface for high dewatering and good drainage.
- Thick slide rails provide a long service life and also manage large compressive forces.
- Entirely enclosed, safe and hygienic.

SPECIFICATIONS

Width	<400 mm
Capacity	0,1-4 m ³ /h
Drive unit	SEW/Nord
Material	EN 1.4301, EN 1.4404
